DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-3, 6, 9-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2 and 6 are indefinite because it is unclear which "slide" is being referred to because Claim 1 recites 2 slides.

Claim 3 has no antecedent for "the horizontal plane".

Claim 9 has no antecedent for "the carousel".

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2851

2. Claims 1-4, 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Ushiro et al.

Ushiro et al. discloses a projection arrangement wherein one or multiple slide transparencies may inherently be placed movably upon a projection location. A projection head assembly (8) allows for movement of the projection lens from a position above the slides to a position away from the slides, by mean of pivotable means (22), allowing for easier access. Movement of mirror (28) inherently allows for vertical projection. Slide holder (150) is rotatably mounted.

The claims, as presented, have no limitations drawn to the simultaneous projection of the slides.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 12-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ushiro et al.

Art Unit: 2851

Ushiro et al. discloses the invention substantially as claimed but does not specify the images formed upon the slides.

The use of particular images formed upon the slide means, such as a night horizon, a starfield, a celestial body, a solar system are deemed to be intended uses for the structure. It would have been obvious to one skilled in the art at the time of the invention to modify the device of Ushiro et al. to project any desired image formed upon a slide. Similarly, the declaration of the device as a "planetarium" fails to distinguish the structure of the device in any way.

Allowable Subject Matter

5. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 6, 9-11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
